

# Umm e Fizza

Frontend Developer

## About Me

I am a passionate frontend developer transitioning into a full stack developer role. With a strong command over HTML, CSS, JavaScript, TypeScript, and React, I have built multiple responsive and dynamic web applications. I am currently expanding my expertise in backend technologies such as Node.js and Python to become a well-rounded developer. I'm also pursuing certifications in Generative AI, Web 3.0, and Autonomous AI Agents, which align with my goal to build intelligent, scalable, and modern web solutions.
